

PDF DESIGNER

Your résumé should print exactly as you designed it.

A local-first PDF studio for source-backed, AI-assisted, honest applications — with a branded version for your human eyes.

Founder & Lead Developer

SKILLS

WORK EXPERIENCE

HTML → PDF · LIGHT + DARK · PRIVATE VAULTS · RENDERED QA

Design once. Export the right PDF for the moment.

One HTML source keeps the page geometry stable while every export serves a different reader.

A

Light PDF for boards

System-font print styling and a text-layer check keep applications parseable for Jobright, Indeed, and LinkedIn.

H

Dark PDF for humans

The branded version carries the same content and pagination for a person reviewing your work.

01

Start

Open a public example or your own local workspace.

02

Shape

Write in HTML, select a palette, and keep claims source-backed.

03

Export

Create synchronized light and dark PDFs.

04

Verify

Run rendered QA; use the light file for boards.

One checkout. Your data stays yours.

Privacy is gitignore plus clear local folders — not a second app, a cloud vault, or an environment file.

Build your résumé. Keep your story. Verify the PDF.

Release status: the public path is prepared; GitHub publication, Patreon/blog posting, history scrub, and paid extras remain human decisions.
